Full-stack developer with an education in psychology and experience as an editor and writer. Received web development training through the Vanderbilt Coding Bootcamp, during which time skills in areas including the MERN stack, SQL, and Redux were developed. I have created websites, including an e-commerce site and property listing site. Other skills include written and oral communication, the ability to pick up new technologies quickly, and logical problem-solving. Combined with dedication and adaptability, the goal is to push ahead and keep learning and succeeding in the field.

TECHNICAL SKILLS

Languages: JavaScript ES6+, CSS3, HTML5
Applications: GitHub
Tools: Bootstrap, jQuery, MERN, PWAs, Redux

PROJECTS

E-commerce Site | Independent Project
Full-stack Developer

- The project took experiences I learned from a similar project and took it to the next level, fully integrating stripe and providing a robust user experience and admin dashboard with weekly sales statistics
- Role: Led the project with another developer, completely taking care of the back-end of the application and doing most of the front-end functionality, including custom hooks, responsiveness, and state

Deployed Application: https://sellouts.herokuapp.com/
GitHub Repository: https://github.com/SpencerHulse/sellouts

E-commerce Site | Vanderbilt Coding Bootcamp
Full-stack Developer

- The project involved creating an e-commerce site from the ground up, utilizing some basic Stripe setup, Redux Toolkit, and GraphQL with Apollo Server
- Role: I took lead on the backend, a majority of the React components and functionality, and connecting the front-end and back-end of the application

Deployed Application: https://n-sense.herokuapp.com/
GitHub Repository: https://github.com/SpencerHulse/n-sense

Property Listing Application | Vanderbilt Coding Bootcamp
Lead Back-end Developer

- A full-stack application that allows landlords to list rental properties

- Role: Took the lead on the back-end development, taking care of almost all of the routes, JS, and database code

Deployed Application: https://glacial-temple-16968.herokuapp.com/
GitHub Repository: https://github.com/SpencerHulse/tenantively-maybe-probably
